## Functional Elegance for busy lives

At Benjamin Hooper Design, we create bespoke furniture that blends timeless design with functional elegance, tailored to suit your unique needs and lifestyle.

From the initial consultation to the final installation, our process is seamless, transparent, and enjoyable.

As a small studio, we take on fewer than 25 projects a year, ensuring every commission receives the attention it deserves. Benjamin personally oversees each project to guarantee the highest standards of craftsmanship and service.

If you're looking for a custom-built wardrobe, a refined home office, a kitchen renovation, or elegant storage solutions, we're here to guide you every step of the way.

Every piece reflects our commitment to quality materials, meticulous craftsmanship, and thoughtful design. We look forward to working with you to create furniture that enhances your home and simplifies your life.

---

---

## Our Story

Benjamin Hooper's journey began on a smallholding in Devon, where he developed a love for traditional craftsmanship while learning woodworking fundamentals in family workshops.

Now based in East London, Benjamin draws on a lifetime of hands-on learning, and over a decade of industry experience, to create furniture that embodies both timeless design and meticulous attention to detail.

With a passion for taking ideas from concept to creation, Benjamin Hooper Design is dedicated to delivering the highest quality products and ensuring every detail reflects your vision.

At Benjamin Hooper Design, we specialise in creating bespoke furniture and kitchens that combine function and elegance, designed to fit seamlessly into your life.

Our mission is to transform your space with high-quality solutions that enhance both form and function, while offering a personalised, one-to-one service that exceeds expectations.

---

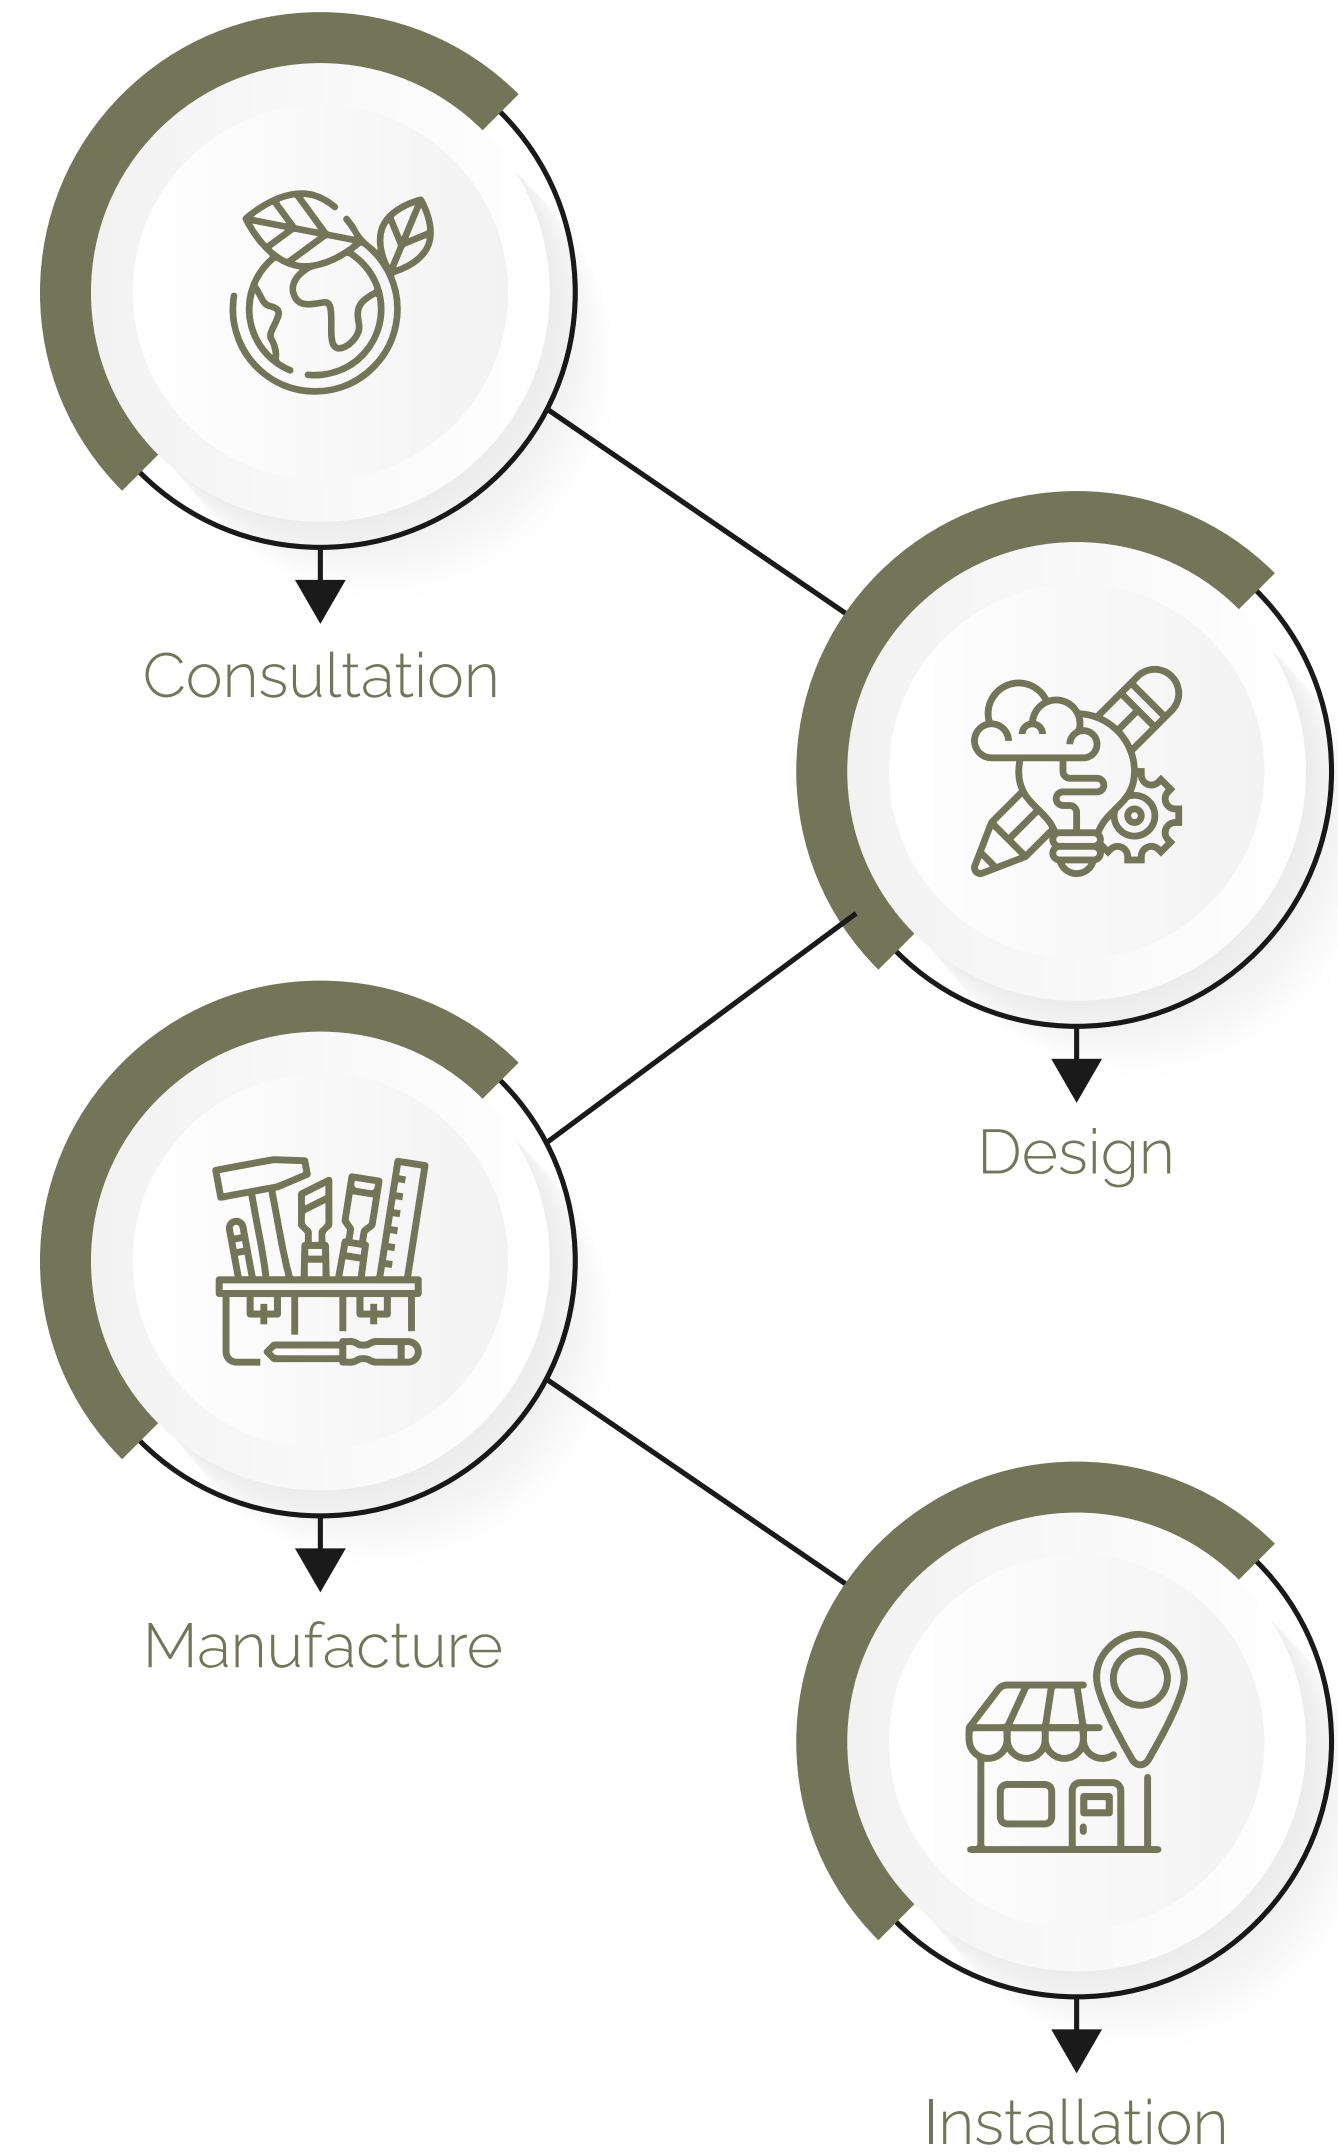

---

# The Services We Offer

---

Our Services are available individually or as part of a complete project package and we will always suggest the best options for your specific requirements.

---

---

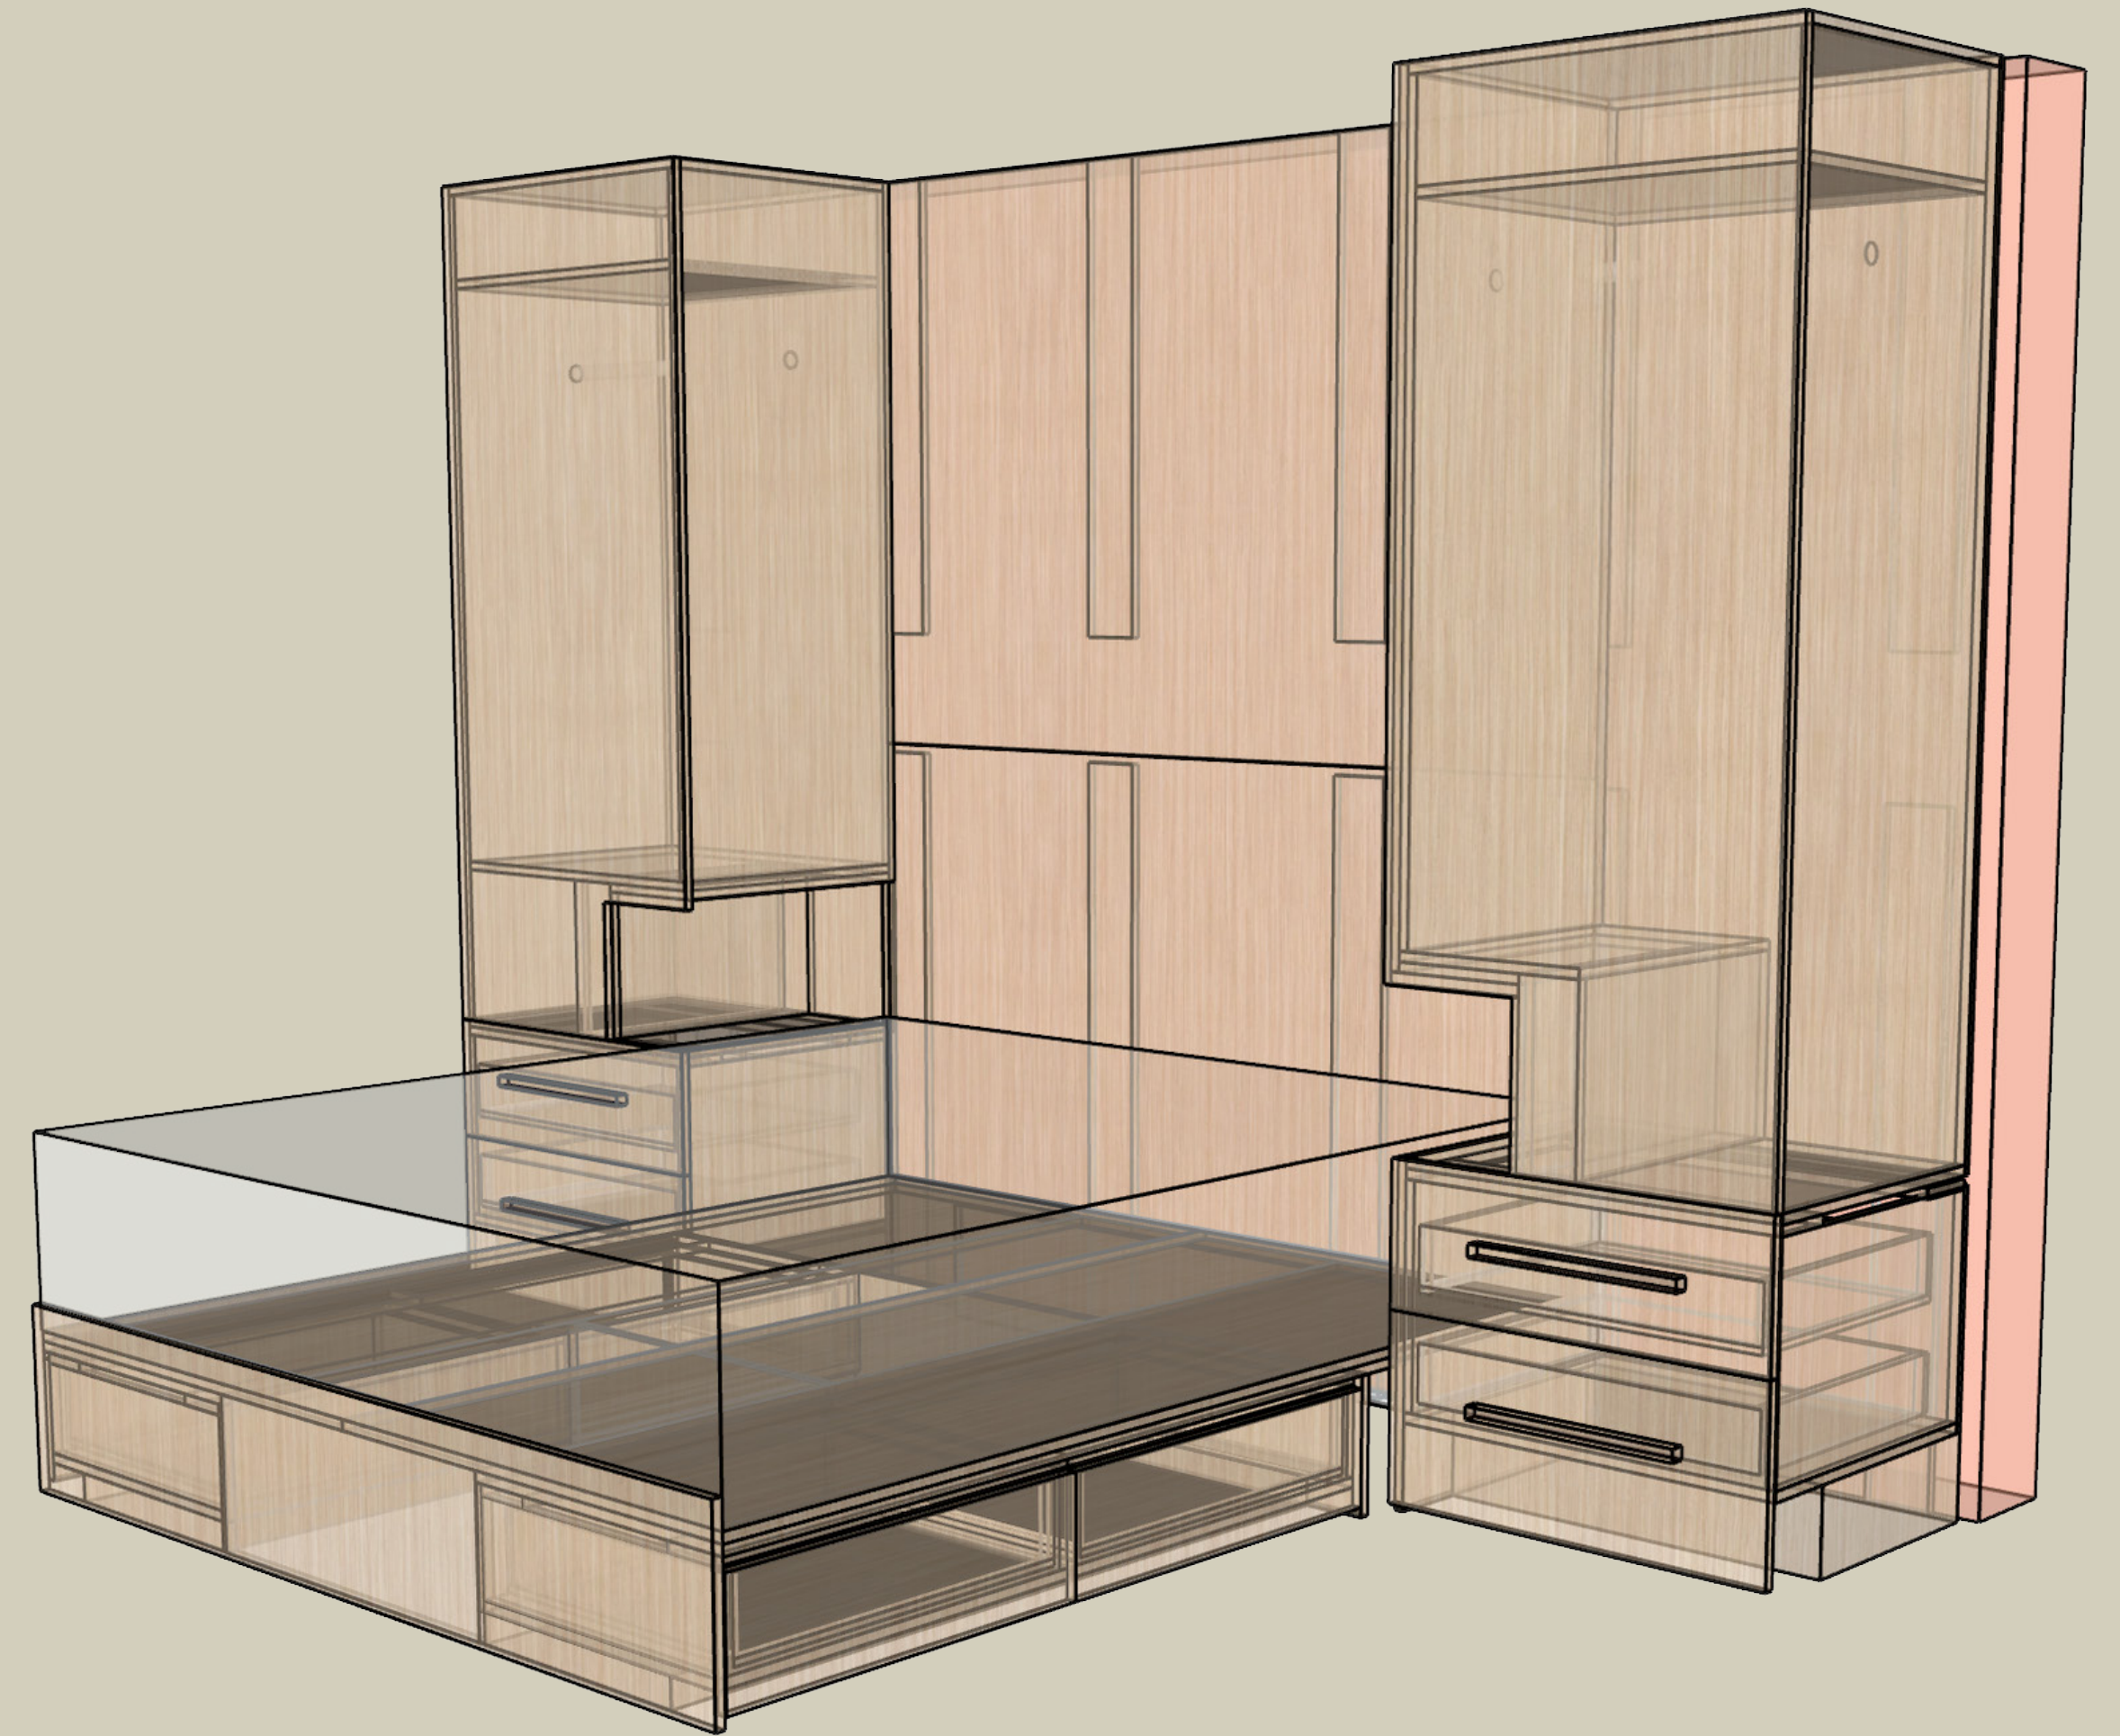

# Initial Consultation

We begin with a personalised consultation to understand your needs, style, and the space you want to transform. The initial consultation starts with a phone or email discussion to explore your project. An in-person consultation and detailed measurements are included as part of the design services.

---

# Design Phase

We create detailed 3D drawings so you can visualise how your bespoke furniture will look and function within your home. This phase includes two rounds of amendments and a site visit and consultation. Additional amendments are available to ensure we get the design just right. We do not look to book manufacture dates until the design is perfect and you are happy to move forward.

---

## Manufacture

Every piece is crafted in our workshop using high-quality, responsibly sourced materials. With meticulous attention to detail, we ensure each component is built to last. Once the material delivery is safely in the workshop and inspected for quality we begin to fabricate your project and keep you updated of the progress.

---

---

## Completion and Sign off

Our expert team installs your furniture with care and precision, ensuring a perfect fit and minimal disruption to your home.

Once the installation is complete, we'll walk through the project with you to ensure everything meets your expectations. We'll guide you through the care and upkeep of your new furniture.

---

# Frequently Asked Questions

## How long does the process take?

All our commissions are bespoke and therefore vary in timeframes, however for an average mid size project we can expect:

**Design Phase** 1 - 3 weeks, including consultations and amendments.

**Manufacture** 2 - 3 weeks on average, though larger projects may take longer.

**Installation** 2 - 4 days, however larger projects may require additional time.

## What does the design fee include?

- An onsite consultation and detailed measurements.
- 3D drawings to visualise the design.
- Two rounds of amendments. Additional revisions are available at an hourly rate.

## Can you provide a cost breakdown?

Yes, a detailed breakdown can be provided at the end of the design phase, once the final design is approved.

## Do you offer repairs or adjustments after installation?

We stand by the quality of our work and will work with you to resolve any adjustments if needed.

## Can you match an existing style?

Yes, we can work with existing styles or design references.

## What happens if I need to delay?

If delays arise, contact us early. Storage fees may apply if manufacturing is complete.

## What's the best way to get started?

Book a consultation through our website or contact us directly.

### Why is the design phase sign-off important?

The design sign-off is a crucial step in ensuring that your vision is perfectly translated into the final product. It allows us to finalize material orders, begin production, and secure your manufacturing slot.

Without this step, we cannot accurately schedule manufacturing or installation timelines, as any delays in the design phase can have a knock-on effect.

### Do you offer sustainable materials?

Yes, we prioritise using responsibly sourced, high-quality materials.

### When can I book an installation date?

Installation dates can only be confirmed after the design phase is signed off and materials have been delivered and inspected for quality. This ensures we can commit to a reliable timeline without unexpected delays caused by material defects or availability issues.

Wood is a natural material, and its inherent variability means each delivery must be thoroughly checked before we move into the manufacturing stage.

### What area's do you cover?

We primarily serve London but also take on projects across the South of England.
